Radical change happens at the most basic level.

Introducing Puracyn® Plus Professional Formula Wound Irrigation Solution, a next-generation solution for optimal wound bed preparation.

WOUND IRRIGATION
Non-sensitizing, Non-toxic, Non-irritating
HOW DOES THE BODY HEAL A WOUND?
The healing process typically begins in the inner tissue layers and expands to the surface layer of the skin.¹
In normal wound healing, cleansing and irrigation are critical steps needed to minimize the risk of complications.² Irrigating a wound helps to remove dirt and debris while avoiding trauma to the wound bed.²

PHASES OF WOUND HEALING³

HOW CAN I TAKE THE BEST CARE OF MY WOUND?
Preparing the wound bed is the first step in creating and maintaining the best environment for your wound to heal.⁴

HOW CAN PURACYN® PLUS PROFESSIONAL FORMULA WOUND IRRIGATION SOLUTION HELP MY WOUND?
Puracyn Plus Professional Formula Wound Irrigation Solution is a natural, easy-to-use solution that can help irrigate, debride, and cleanse your wound bed.

WOUND CLEANSING MADE EASY
Puracyn® Plus Professional Formula Wound Irrigation Solution Directions for Use

1 When you change your dressing, you will need to clean your wound. Once you have removed your dressing, apply Puracyn Plus Professional Formula Wound Irrigation Solution directly on to wounds to flush away dirt and debris.

2 Continue application until the wound is thoroughly cleaned.

3 Gauze dressings may be saturated with Puracyn Plus Professional Formula Wound Irrigation Solution and then placed directly onto the wound.

4 An adherent cover dressing can then be applied to help keep the wound clean.

5 Repeat this process as needed. If dressings are adhering onto the wound bed you may soak the dressings with Puracyn Plus Professional Formula Wound Irrigation Solution to aid in easier removal.

Puracyn Plus Professional Formula Wound Irrigation Solution contains hypochlorous acid, a known antimicrobial, which serves as a preservative to inhibit the growth of microorganisms within the product.

Puracyn Plus Professional Formula Wound Irrigation Solution contains hypochlorous acid, a preservative that may inhibit the growth of microorganisms within the solution. Warning: Please consult a health care professional in the case of deep wounds, puncture wounds, animal bites, serious burns that worsen, or persist for longer than seven days. Keep out of reach of children. For external use only.
